VDC enables clients to spend more time on their business operations because we focus on safe, proven, and professional drilling and blasting services. \* Since 1999, VDC has delivered unrivaled expertise to the coal mining and construction industries. \* We specialize in all aspects of drilling and blasting — from regulations to safety and blast design. \* Our solutions are affordable and help you maximize profits and increase production.

## OUR CORE SERVICES

### Drilling

Safe, efficient, and tailored for your project.

### Blasting

Specializing in coal mining and construction operations.

### Safety

Priority one for every drilling and blasting operation.

## OUR CORE SERVICES

### Drilling

VDC is the leader in outsourced drilling services and the trusted partner to get your job done safely and efficiently. With first-class equipment and unmatched expertise, VDC can handle the most challenging drilling projects.

#### **Coal Surface Mine Production Drilling**

VDC's comprehensive drilling plans are tailored to your unique requirements. We provide all the necessary equipment and manpower to safely complete each drilling project.

#### **Geotechnical Exploratory Core Drilling**

The skilled geotechnical experts have full-service rigs, superior penetration rates, and the equipment to get your core samples out of the earth intact and undamaged.

#### **Construction Site Preparation Drilling**

Our professional team of experts has the manpower, equipment, and skills necessary to handle your site preparation needs and complete your job on time and within budget.

### Blasting

Choose the professional blasters at VDC for your coal surface and underground mining operations or site preparation construction projects.

#### **Coal Surface Mine Production Blasting**

VDC assumes responsibility for all liability and regulatory obligations, offers safety training, and provides all equipment and explosives needed for your project.

#### **Coal Underground Blasting**

We assist clients with boom-hole, over-cast, under-cast, and equipment recovery needs. VDC brings all equipment and obtains necessary safety permits while following the strictest safety measures.

#### **Construction Site Preparation Blasting**

With teams of dedicated blasting professionals, VDC has the manpower, equipment, and explosives your preparation project demands.

### Safety

Safety is a chief concern at VDC and year after year, we continue to have one of the best safety records in the industry. Our employees continually undergo training to keep up with the most advanced safety procedures and regulations for drilling and blasting projects.

#### **Customized Training**

Each VDC employee must undergo all federal, state, and local training required for the project.

#### **Continuous Learning**

VDC employees attend weekly training sessions and must undergo immediate training any time an accident occurs at a project site.

#### **Customer Training**

VDC shares its industry-leading knowledge about safety by making its training resources available to customers.

#### **Incentives**

After each quarter of accident-free work or zero property loss, VDC provides financial rewards to its employees.

#### **Screening and Monitoring**

VDC has a zero-tolerance policy for drug use. Employees undergo pre-employment and random drug screenings and are subject to yearly criminal record checks.

## INDUSTRIAL APPLICATIONS

VDC offers safe, reliable, and expert solutions for these types of projects:

- Coal surface mine production drilling and blasting
- Construction site preparation drilling and blasting
- Surface-based earth drilling
- Geotechnical exploratory core drilling
- Coal underground blasting
